# Project: Adhere Android Application

Project Type: Proposal

Adhere Android Application

Project Description:

The Adhere android application allows hospitals & clinics to facilitate communication and efficiently share information, in the form of video content and magazines, to their patients. It also allows patients to make appointments with hospital or clinical staff registered counsellors to discuss health matters which may be troubling them.
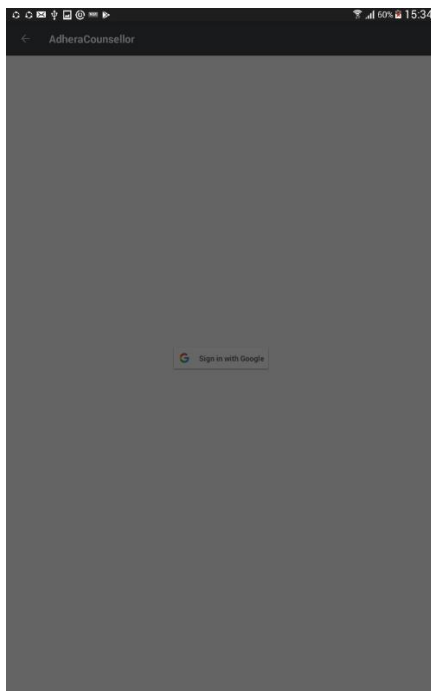

Dashboard & Sidebar Bar Menu

Book Appointment: It allows you to book an appointment with a user

**Chat**: Chat with counsellor or client depening on which application you have opened

Videos: loads video content from Adhere's YouTube channel using the Android Studio YouTube API.
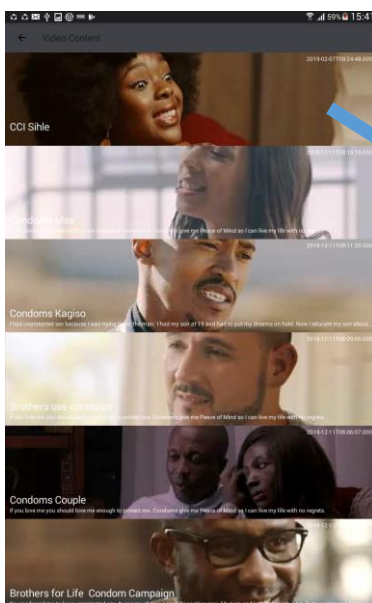

Profile: shows your name and password

Logout: redirects you back to the login screen
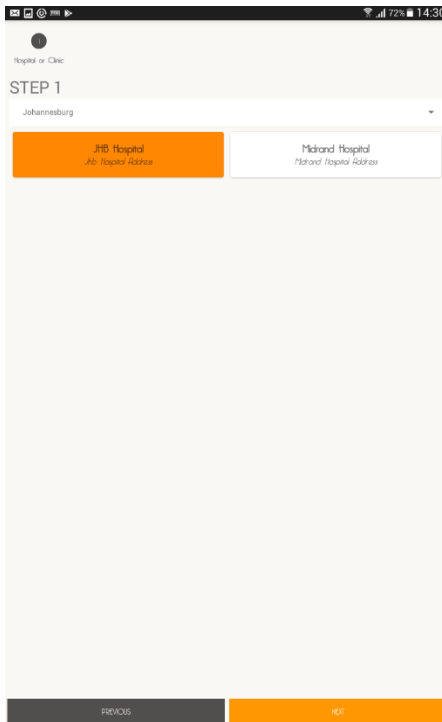

Registration: integrated Google Sign-In ign-In

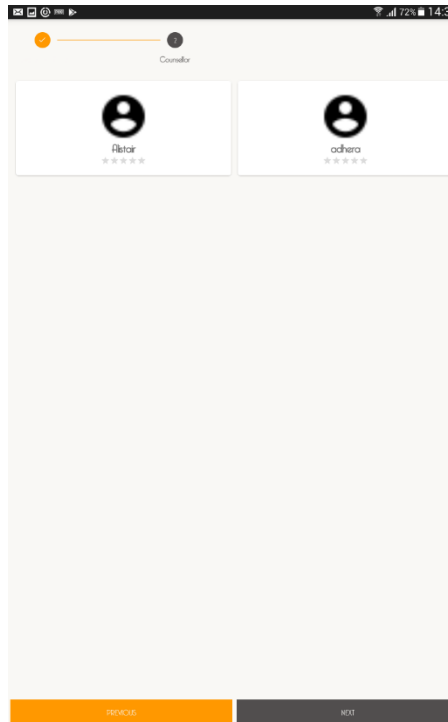

Contact List: List of logged in contacts

Video Content: List view of videos loaded from YouTube channel using Android Studio's YouTube API.

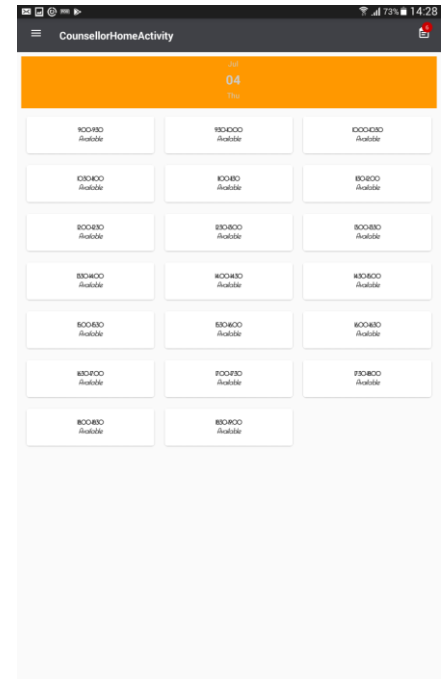

Playing video from list.

Client Registration Process

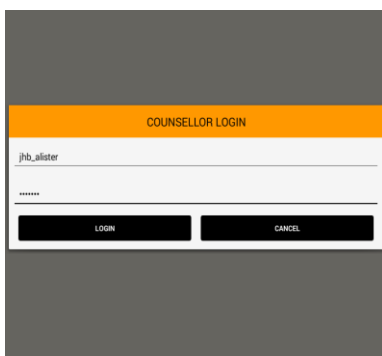

Step 1: Select the hospitals new you

Step 2: Select available counsellors within that hospital
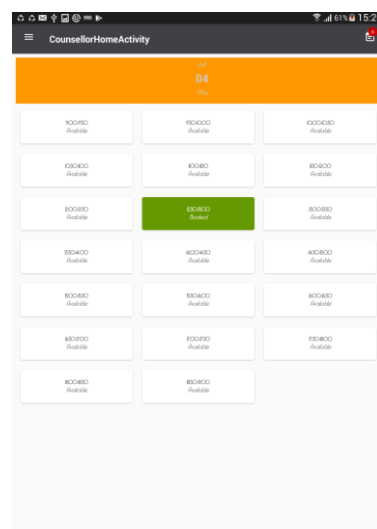

**Step 3:** You select an available timeslot and make an appointment
